"Domestic Engineering" Quarterly Index

Vol. LXVIII—July 4 to September 26, 1914

This is the nineteenth index of "Domestic Engineering," an index for each quarter appearing at the end of that quarter. We ask our readers to note the value of this index for reference, calling special attention to the separate classification of the departments of "Literature, Catalogs" and "Questions and Answers," and to the "Inventions and Improvements," which give you a line on up-to-date practice and materials.

What Sizes of Pipes Should be Used in Steam Heating Plants?

This is an Every-day Question to the Steam Fitter. His Success Largely Depends Upon Finding the Correct Answer

"SIZES OF FLOW AND RETURN STEAM MAINS"

Includes the replies of 26 leading American engineers to this question together with the report of the Committee of The American Society of Heating and Ventilating Engineers upon "Standard Sizes of Steam and Return Mains."

This little book is a complete summary of present-day theory and practice as reflected by the opinions of those best competent to judge.

No Steam Fitter can afford to be without this book.
